NEWS

Ontario's new regulation aims to facilitate the recovery of minerals from mine waste, but many hurdles remain, experts say

By Kelsey Rolfe | February 20, 2025

Canadian Institute of Mining

Historic tailings in Canadian mining camps such as Cobalt have remained largely **untouched for 50 to well over 100 years**

as disturbing historical tailings risked inheriting all environmental liability associated, permits took years, and required closure bonds.

**As of July 2025, this changed** with the Recovery Permit: Short turnaround, liability protections, and closure requirements waived.

STLLR Gold in Timmins as of early 2026 has already procured this permit.
